PETERS PAULJI

Senior Full Stack Developer | Laravel & PHP Backend | React / Next.js Frontend
Lagos, Nigeria • pauljizy@gmail.com • 08148935054 • github.com/soma-connects

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3+ years of experience building production-grade web applications. Strong backend expertise in Laravel (PHP), MySQL, and REST API development, complemented by modern frontend skills in React and Next.js. Proven track record of delivering end-to-end solutions across fintech, SaaS, and e-commerce platforms — from database architecture and authentication to deployment and CI/CD. Adept at writing clean, maintainable code and collaborating effectively with cross-functional teams.

TECHNICAL SKILLS

Backend	Laravel (PHP), PHP 8, REST API Design, MVC Architecture, Eloquent ORM, Artisan CLI
Frontend	React, Next.js 15, TypeScript, JavaScript (ES2022+), TailwindCSS, Bootstrap, HTML5/CSS3
Databases	MySQL, PostgreSQL, Supabase, Query Optimization, Schema Design
Languages	PHP, Python, TypeScript, JavaScript, SQL
DevOps/Cloud	Git, GitHub Actions (CI/CD), Vercel, Netlify, Cloudflare R2
Auth & Security	JWT, Laravel Sanctum, Supabase Auth, API Security, Role-based Access Control
AI & Automation	Gemini AI, LLM Integration, Workflow Automation, Python Worker Services
Blockchain	Solana, Web3, Smart Contract Automation, On-chain Event Monitoring

PROFESSIONAL EXPERIENCE

Lead Developer (Founder) | Ncliper — AI SaaS Platform | *2024 – Present*

- Architected and shipped a production-grade full-stack SaaS platform using Next.js, TypeScript, Python, and PostgreSQL with full CI/CD pipeline via GitHub Actions.
- Designed scalable REST APIs and backend services handling high-concurrency video processing workflows.
- Built structured database systems with PostgreSQL and Supabase, ensuring data consistency, efficient querying, and vector search (pgvector).
- Implemented authentication, object storage (Cloudflare R2), and serverless GPU workers (Modal) for compute-intensive tasks.
- Delivered 61+ commits across a structured monorepo with Jest test suite and TypeScript strict mode throughout.

Founder & Lead Developer | AlphaScale — Trading Alpha Platform | *2024 – Present*

- Built a full-stack reputation-verified content platform extending the Ncliper AI pipeline to a new domain.
- Designed reusable backend architecture and APIs supporting scalable, data-driven features with Next.js, Supabase, and TypeScript.
- Implemented FairScale credibility scoring system with structured database relationships and authentication.

Blockchain Developer | N-Reclaim — Solana Automation | *2024 – Present*

- Developed backend automation logic for real-time blockchain event monitoring and automated transaction execution on the Solana network.
- Built management dashboard with full-stack integration, demonstrating event-driven architecture and transactional system design.

Frontend Developer | SecureHub Admin Dashboard | *2024*

- Designed and shipped a full-featured admin dashboard (98% TypeScript) with backend API integration, deployed to Vercel and Netlify.
- Applied Figma-to-code MCP workflow for pixel-perfect UI delivery and laundry-service backend integration.

Junior Web Developer | Eduremaisolf | *Mar 2022 – Oct 2023*

- Built full-stack web applications using PHP and MySQL including a school management system and hotel e-commerce booking platform.
- Implemented backend logic for user authentication, database operations, admin dashboards, and business process automation.
- Managed full client lifecycle from discovery and requirements gathering through development and delivery.

KEY PROJECTS

ND-Project2 — github.com/soma-connects/ND-Project2

- Full-stack PHP/Laravel project demonstrating backend architecture, database design, and REST API development.

Ncliper — ncliper.vercel.app

- AI-powered SaaS platform — full-stack with Next.js, Python, PostgreSQL, Gemini AI. Live in production.

SecureHub Admin Dashboard — secure-hub-admin-dashboard.vercel.app

- Full-featured admin dashboard — TypeScript-first, deployed live on Vercel and Netlify.

EDUCATION

B.Eng. Computer Engineering | Michael Okpara University of Agriculture, Umudike | *2017 – 2022*

- Final Year Project: Gesture Video Control System using Arduino and Ultrasonic Sensors — hands-free media playback via hand distance and movement detection.
